“FOR YEARS I LITERALLY DREAMED
THAT FINALLY I WOULD HAVE
THE PERFECT SOUND SYSTEM -
WITHOUT COMPROMISE.”

- PETER LYNGDORF

THE PARTNERSHIP

Steinway Lyngdorf is the result of a visionary ambition and uncompromising commitment – a shared dream which brings together Steinway & Sons, makers of the world's finest pianos for over 150 years, and Peter Lyngdorf, one of the most forward-thinking audio innovators of our time.

These two icons in the field of sound share a common mission – to make us listen, not just with our ears, but with all of our senses.

“At Steinway & Sons, we value the reputation for excellence and quality that we have earned through handcrafting the world's finest pianos for more than 150 years. Peter Lyngdorf's uncompromising commitment to excellence in sound reproduction has resulted in a truly remarkable range of sound systems, making for a perfect collaboration in every respect.”

Thomas Kurrer, President, Steinway & Sons

THIS IS TRUE SOUND

Sound shaped by distinguished traditions,
visionary innovations and unmatched craftsmanship.

Sound that is exceptionally true-to-life.

Sound, as it is meant to be heard.

At Steinway Lyngdorf, we are uncompromising
in our pursuit of perfection.

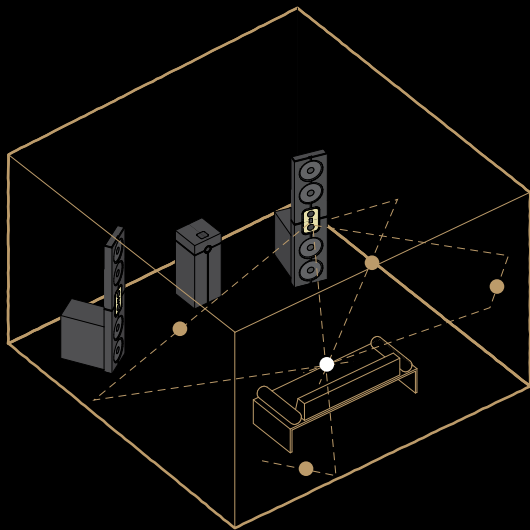

Redefining the science of sound reproduction, our groundbreaking digital music and home theater systems are created for discerning customers who demand audio experiences that express the soul of the source material.

To deliver powerful, multi-sensory experiences, Steinway Lyngdorf combines the best of high-performance integrated digital technologies, classic design and unparalleled craftsmanship.

From the howl of a blues guitar to symphonic crescendos; stirring film dialogue to cinematic sound effects – the subtlest nuances and richest textures are reproduced in their purest forms through unprecedented and proprietary innovations.

REVEL IN TECHNICAL MASTERY

RoomPerfect™ maps the entire sound field in 3-D before applying room correction.

Steinway Lyngdorf's audio prowess begins from the inside. Our intelligent engineering ensures operational simplicity, featuring minimalist design and integrated setup for easy installation and operation.

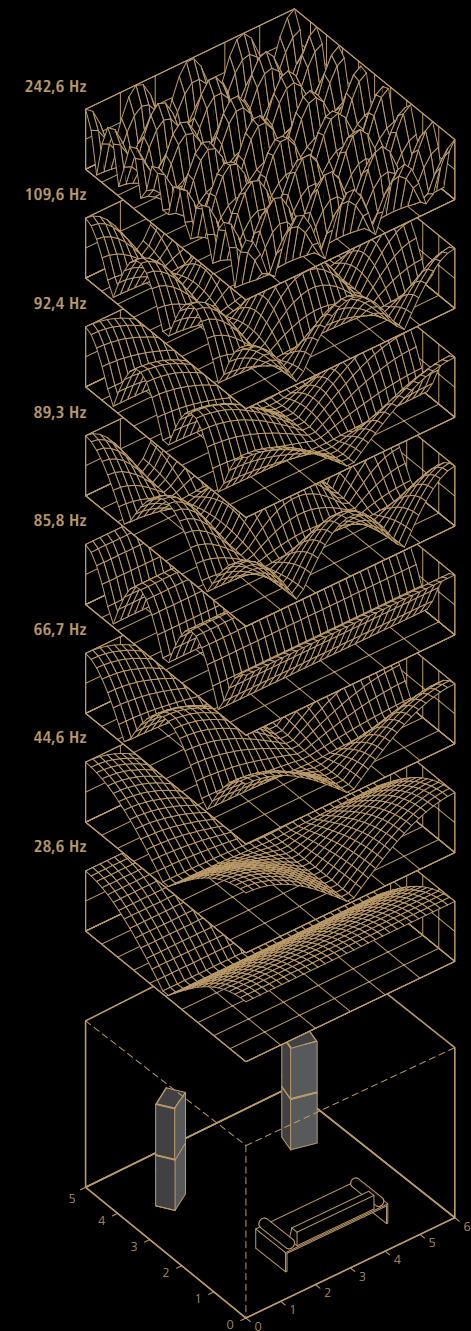

All our sound systems are fully digital and integrated. Utilizing the proprietary **Steinway Lyngdorf Link** it allows high definition sound to pass through unaltered, and maximizes the full potential of the amplifier by ensuring that the signal path remains entirely in the digital domain.

Together with our **Fully Digital Amplification** technology that boasts an exceptional signal-to-noise ratio, Steinway Lyngdorf's sound systems offer listeners stunning dynamic range at any playback level.

Our true bass management combined with the usage of **Boundary Woofers** delivers stunning and realistic bass performance. The highly efficient electronics also ensure that the system does not get over-heated to guarantee hardware longevity.

With a Steinway Lyngdorf system, the sweet spot is anywhere you happen to be. Our proprietary **RoomPerfect™** technology, the world's first and only 3-D room compensation technology, adapts the system to the room by mapping a 3-D sound field and adjusting the output to suit the listening space.

Completing the experience, our integrated system philosophy ensures high efficiency in every aspect. All Steinway Lyngdorf systems are modular – they can be mixed-and-matched with other components in the product family. This intelligent modular engineering, coupled with fully digital technology, allows for future system upgrades where relevant.

Measuring up to 2 million reflections, RoomPerfect™ is the world's only system to measure what you actually hear.

EXPERIENCE INSPIRED CRAFTSMANSHIP

Fusing skilled artisanship with sonic innovation, each Steinway Lyngdorf component boasts exceptional technical craftsmanship. Our Air Motion Transformer tweeters, for instance, feature ultra-thin membranes with large surface area, and produce exceptionally higher volume and more detailed sound than conventional dome tweeters.

Each Steinway Lyngdorf system offers customized design choices. Depending on your room configuration and lifestyle needs, you can select from a range of installation options from floor-standing, wall-and ceiling-mounted choices, to virtually 'invisible' in-wall mounting that is hidden from view.

Form meets function at Steinway Lyngdorf. Smart tactility enhances the Steinway Lyngdorf listening experience. This is best expressed by our iconic Model P1 remote control, which features the distinctive volume wheel mounted on precision-machined Swiss bearings, putting the power of immersive sound at one's fingertips.

Handcrafted artisanship is another legendary hallmark. Using time-honored techniques, trained craftsmen ensure that each component is finished to the utmost quality. The systems' selection of exquisite high-gloss black finish mirrors the signature look of a Steinway & Sons grand piano and involves a similar application process that takes up to eight weeks to perfect.

DISCOVER THE EXCEPTIONAL

From large 1,000-seat commercial theaters to cozy residential spaces, Steinway Lyngdorf delivers ultimate sound experiences through our unique fusion of unmatched performance, fine craftsmanship and exquisite design.

Experience the exceptional in every model within Steinway Lyngdorf's product range. Appealing to music connoisseurs worldwide, the flagship Model D exemplifies the best of Steinway Lyngdorf's audio and design prowess, while the Model C embodies the same distinguished hallmarks to offer stunning acoustics from compact floor-standing dipole speakers matched with boundary woofers. The Model LS is an ideal choice for all who seek immersive stereo and home theater sound in both medium to large environments. For those who value performance and assured quality alongside discreet décor, the Model M offers rich and dynamic sound from beautifully architected speakers, while the sleek and compact S - Series offers astonishing sound as well as wide ranging installation and décor options.

Discover a world of sound experiences so extraordinary that life itself becomes music to your ears.

THE ART OF PERFECTION

MODEL D SOUND SYSTEM

Rewriting the rules of audio technology and embodying the finest craftsmanship, the Model D Sound System is Steinway Lyngdorf's flagship model.

Setting the standards with all of Steinway Lyngdorf's distinctive hallmarks, it features **Fully Digital Amplification** and **RoomPerfect™** technologies, intelligent modular versatility, and artfully hand-finished components.

The Model D in a stereo system setup comprises a floor-standing head unit with an integrated CD player driven by industrial-grade servomotors. Two free-standing open-baffle dipole speakers provide tonally precise and exceptionally life-like sound reproduction. Comprehensively modular, the Model D speakers can also be integrated into a home theater configuration.

A distinguished masterpiece, the Model D's iconic black lacquer finish is one of many stunning finishes available. The system can be further customized with a selection of wood and color lacquer finishes with either gold or chrome accents.

Model D stereo configuration with head unit. Shown in piano black high-gloss lacquer with gold accents.

INTIMATE & COMPELLING

MODEL C SOUND SYSTEM

The Model C Sound System delivers compelling sound experiences in a more compact form, making it an ideal choice for music as well as home cinema lovers.

Conceived from the same blueprint as the Model D, the classic Model C stereo system features two-way, free-standing dipole speakers that contain the same mid and high modules as the Model D, the head-unit with its iconic volume wheel, along with two separate **Boundary Woofers**.

The system retains all the hallmarks of Steinway Lyngdorf systems including **Fully Digital Amplification** and **RoomPerfect™** technologies.

As with any Steinway Lyngdorf system, modularity is essential. The speakers can be configured into home theater setups by pairing them with the appropriate surround sound speakers, the Model A1 or A2 Digital Amplifiers, and the Model P1 Surround Sound Processor.

Distinguished by superb craftsmanship, the Model C expresses refined aesthetics with sleek, contemporary design and a range of customized finishes.

DISCREET & ASTONISHING

MODEL M SOUND SYSTEM

Tailoring your sound system to your discreet décor requirements while deriving the most astonishing sound out of any music genre, the Model M Sound System puts the power of personalized indulgences in your hands.

The Model M offers a myriad of installation options with slim and stylish speakers that can be mounted on and in walls, partially or completely concealed, as well as in ceilings. This discreet range offers maximum versatility to build your dream sound system whether in large-sized home theaters or compact listening rooms.

Emanating style and substance in equal measure, the Model M guarantees powerful and true-to-life digital audio, delivering first-rate performance whether as a stereo or multi-channel system.

The Model M leverages Steinway Lyngdorf's unique **Bass Management** with **Boundary Woofers**, as well as **Fully Digital Amplification** and **RoomPerfect™** technologies.

COMMANDING & IMMERSIVE

MODEL LS SOUND SYSTEM

Sound intimacy isn't merely defined by proximity. Even in expansive performance halls and spacious living rooms, the Model LS Sound System promises fully immersive and intimate audio experiences.

With an innovative line-source approach, stackable speakers and **Boundary Woofer** modules, the Model LS disperses sound in cylindrical patterns to ensure perfect sound quality over large distances. It is one of the most powerful home theater systems with the highest dynamic range.

Floor-to-ceiling extensions of the line-source speakers ensure volume and tonal consistency by substantially reducing echoes caused by room influences, thus facilitating high-quality audio to listeners situated even at the back of the room.

Apart from music enjoyment, the Model LS is ideal for home theaters or even commercial cinemas with seating capacity of around 1,000. One can combine the Model LS speaker modules with a selection of Steinway Lyngdorf's state-of-the-art electronics, and a high-definition video source for a multi-sensory cinematic journey unlike any other.

CAPTIVATINGLY COMPACT

S - SERIES SOUND SYSTEM

The S - Series delivers stunning, true-to-life sound from a surprisingly compact size – making it a winning solution for compact residences, prestigious hospitality and private yacht areas where space is a premium but exceptional experiences are not to be compromised.

Taking its core DNA from the signature Steinway Lyngdorf systems while achieving its own unique identity, the S - Series features an innovative patent-pending **AER (Ambience Enhancing Radiation)** tweeter design. The result is a dispersion of the highest frequencies which achieves an enveloping and ambient sound.

The S - Series can deliver stunning sound pressure levels relative to its size through the use of high efficiency drivers and boundary woofers combined with fully digital amplification and Steinway Lyngdorf's patented **RoomPerfect™** technology.

Soul-stirring acoustic performance is channeled from compact speakers, which can be installed in Stereo or Surround Sound configurations with a variety of placement and mounting options.

Faithfully upholding tenets of distinguished and refined craftsmanship, the S - Series is just as much a visual beauty in exquisite matte black or satin silver variants.

SOPHISTICATED INTEGRATED COMPONENTS

Steinway Lyngdorf combines years of technical know-how with continuous innovation to bring you electronics and accessories that are technologically advanced yet user-friendly. Let our range of digital amplifiers and sound processors, and signature remote control take your listening experience to the next level with design sophistication and unmatched functionality.

MODEL A1
DIGITAL AMPLIFIER

The fully digital Model A1 with 2 channels of amplification is unique in terms of both construction and performance. There is no A/D conversion anywhere in the amplifier, and the intelligent power supply also handles volume control and acts as a power conditioner, resulting in unmatched and dynamic sound reproduction.

MODEL A2
DIGITAL AMPLIFIER

The Model A2 amplifier boasts up to 4 channels of fully digital amplification. The powerful built-in DSP handles electronic crossover filter and loudspeaker equalization. As with the Model A1, volume control is intelligently handled by the power supply, resulting in unsurpassed dynamic range and full signal resolution. The integrated power conditioner ensures consistently clean and crisp sound reproduction.

MODEL P1
SURROUND SOUND
PROCESSOR

In the fully digital Model P1 Surround Sound Processor, audio signals are handled in full resolution and without attenuation. After equalization with **RoomPerfect™**, the signal is sent directly to the intelligent amplifiers on the proprietary **Steinway Lyngdorf Digital Link**. By maintaining the signal entirely in the digital domain, the original sound from the source is preserved.

SP-1 STEREO
PROCESSOR

The SP-1 Stereo Processor delivers fully digital sound for stereo configurations by keeping the audio signal entirely in the digital domain. It communicates with the intelligent amplifiers via the proprietary **Steinway Lyngdorf Digital Link**. By maintaining the signal entirely in the digital domain, the original sound from the source is preserved.

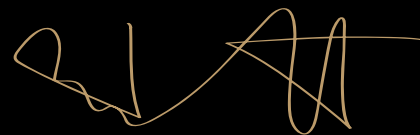

REMOTE CONTROL

The iconic Remote Control is emblematic of Steinway Lyngdorf's mastery of form and function. Featuring an ergonomic cylindrical shape with gold or chrome finishes, and tactile rotating wheel and control buttons that put you in command of the sound system, this statement piece expresses elegance and innovation in equal measure.

“WELCOME TO THE WORLD
OF EXTRAORDINARY SOUND.”
